Are Bats Cool or Creepy?

Step 1: Ask five of your friends: “Are bats cool or creepy?” Make tallies.

<table>
<thead>
<tr>
<th>COOL</th>
<th>CREepy</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Step 2: Color in the graph to show the right number of votes.

Step 3: Answer the questions!

1. Which had the MOST votes?
   _______________________

2. Do you think bats are COOL or CREepy?
   _______________________

COOL     CREepy
Measure it up!

Put the bats in order from smallest to largest. Then use candy corn to measure each bat. Record the length of each bat on the correct line.

a. ____________  f. ____________
b. ____________  g. ____________
c. ____________  h. ____________
d. ____________  i. ____________
e. ____________  j. ____________

The following pages can be used for a bulletin board display.

After reading a nonfiction book about bats, help your classroom measure out a piece of yarn to show 5 inches and then 6 feet. Staple these on the wall along with the labels.

Next, explain to the students that one bat eats approximately 600 bugs in an hour. Put your students into 6 groups and give them 100 bugs to cut out and glue onto a paper plate. These can be displayed along with this sign.
One bat can eat about 600 mosquitoes in one hour!

The smallest bat is the Bumble Bee Bat with a wingspan of 3 inches.

The largest bat is the Flying Fox with a wingspan of 3 feet.
The smallest bat is the Bumble Bee bat with a wingspan of 5 inches.
The largest bat is the Flying Fox with a wingspan of 6 feet.
One bat can eat about 600 mosquitoes in one hour!
The following chart can be created with the students while they fill out the included paper.
I wonder

I learned
I have included two different graphic organizers and writing papers for you to use with your students when writing about bats.
I know a lot about bats!
The Fat bat Game

The Fat Bat Game

This is a fun and simple center activity for your students.

1. Give each child one dice.
   2. Roll the dice.
   3. Write the number in one of the boxes.
   4. Draw that many bugs inside of the bat.
   5. Circle the set of bugs that are drawn with each roll.
   6. Continue until all of the boxes are filled.
   7. For a challenge count how many bugs in all.
Name: ______________________

The Fat Bat Game

How many insects can your fat bat eat?
Roll the dice and fill his tummy!
